U. S. DEPARTMENT OF COMMERCE

Frederick H. Mueller, Secretary

### UNITED STATES FOREIGN TRADE

SUMMARY REPORT FT 930-E

OCTOBER 1959

FOR RELEASE December 2, 1959

BUREAU OF THE CENSUS

Robert W. Burgess, Director

#### EXPORT TRADE BY COMMODITY

The Bureau of the Census, Department of Commerce, announced today that the slight decline in United States exports of domestic merchandise from \$1,464.2 million¹ in September to \$1,460.5 million¹ in October reflected decreases in exports of semimanufactures, crude foodstuffs, and crude materials which were largely offset by increases in exports of finished manufactures and manufactured foodstuffs. The October domestic merchandise export total was about eight percent less than the October 1958 total of \$1,584.1 million. M.S.P. (military) shipments are included in these totals.

Excluding M.S.P. (military) shipments, the October domestic merchandise export total was \$1,376.8 million, a level slightly less than the September total of \$1,384.5 million, and about two percent below the October 1958 total of \$1,402.8 million.

Exports of <u>semimanufactures</u> dropped noticeably from \$226.7 million in September to \$183.5 million in October. Many of the individual items included in this economic class registered small decreases during the period. The more noticeable of these were vegetable oils and fats, from \$11.8 to \$4.3 million;

Available records indicate that there was an increase in September in the number of vessels loaded during that month but not departing until the first of the following month or later. This indicates that accelerated vessel loading took place at the end of September in anticipation of the longshoremen's strike. Some of this accelerated loading probably is reflected in the September totals, but merchandise loaded in September on vessels departing October first or later are included in the October totals in accordance with regular compiling procedures.

synthetic rubber, from \$17.6 to \$10.7 million; industrial chemicals, exclusive of Special Category type 1, from \$26.2 to \$20.9 million; and wood pulp, from \$11.4 to \$6.4 million. Decreases in exports of wheat, from \$47.9 to \$42.5 million and corn, from \$20.7 to \$16.0 million were the chief reasons for the decline in exports of crude foodstuffs from \$114.4 to \$107.2 million. Although the dollar value of exports of crude materials changed only slightly from September to October, \$186.2 to \$184.7 million, sizable counterbalancing changes were reported in exports of some of the individual commodities included in this economic class. Decreases were reported in exports of unmanufactured tobacco, from \$70.3 to \$39.2 million; and coal, from \$35.9 to \$31.5 million, while increases were reported in exports of unmanufactured cotton, from \$26.1 to \$46.2 million and oil seeds, from \$21.0 to \$32.6 million.

ORIDA

The increase in exports of <u>finished manufactures</u> from \$834.5 to \$876.5 million was due primarily to increases in exports of individual items included in this economic class as follows: passenger cars, from \$12.1 to \$22.3 million; ammunition, components and parts from \$10.8 to \$20.9 million; merchant ships, from \$0.6 to \$7.6 million; and railway transportation equipment, from \$5.7 to \$11.9 million. However, appreciable decreases were reported in exports of two items included in this economic class. They were cigarettes, from \$9.7 to \$4.5 million and paper and manufactures, from \$23.5 to \$19.9 million. Exports of manufactured foodstuffs rose from \$102.4 to \$108.7 million as increases in exports of dried and evaporated fruits, from \$2.1 to \$9.1 million, and milled rice, from \$6.5 to \$13.2 million, were partly offset by a drop in exports of manufactured foodstuffs for relief or charity, from \$10.8 to \$5.3 million.

#### EXPLANATION OF STATISTICS

COVERAGE: Export statistics include government as well as non-government shipments to foreign countries. The export statistics, therefore, include Mutual Security Program military aid, Mutual Security Program economic aid and Department of the Army Civilian Supply shipments. Separate figures for Mutual Security Program military aid are shown in the footnotes of this report. Shipments to United States, armed forces and diplomatic missions abroad for their own use are excluded from export statistics. United States trade with Puerto Rico, Hawaii, and United States possessions is not included in this report, but the export trade of Puerto Rico and Hawaii with foreign countries is included as a part of the United States export trade. Merchandise shipped in transit through the United States between foreign countries is not included in exports.

VALUATION: The valuation definition used in the export statistics is the value at the seaport, border point, or airport of exportation. It is based on the selling price (or cost if not sold) and includes inland freight, insurance, and other charges to the port of exportation. Transportation and other costs beyond the United States port of exportation are

excluded. However, in some instances the valuation may not be reported in accordance with this definition, particularly where the export value is difficult to determine or must be estimated. None of the values have been adjusted for changes in price level.

EFFECT OF SAMPLING: The value of export shipments individually valued at \$100 to \$499 (about five percent of total export value) is estimated by sampling. The estimated values are distributed among the individual commodity totals shown in the table. The probable variability in the export figures due to sampling is less than two percent of the individual totals shown, or less than \$50,000. The largest variation from rounding of figures is \$50,000. For further information regarding the sampling procedures, see the September 1953, February 1954, and the January and June 1956 issues of Foreign Trade Statistics Notes.

Further information regarding coverage, valuation, etc., is contained in the "General Explanation" in foreword of Report No. FT 410. For complete statement, see foreword in Foreign Commerce and Navigation of the United States.

Prepared in the Bureau of the Census, Foreign Trade Division

## UNITED STATES EXPORTS OF DOMESTIC MERCHANDISE, BY ECONOMIC CLASSES AND LEADING COMMODITIES: OCTOBER 1959 AND SELECTED PERIODS

(Quantity in units indicated; value in millions of dollars. Figures for 1959 are as originally issued and have not been revised to include published corrections. Figures for 1958 include revisions published with the December 1958 reports, or earlier, but do not include revisions published during 1959. Totals represent sum of unrounded figures, hence may vary slightly from sum of rounded amounts. See "Explanation of Statistics" for information on sampling procedures and effect thereof op data shown.)
